## Time Travel True Stories: Amazing Real Life Stories In The News (Book 1 & 2)

What do Scientists Say About Time Travel? It's fair to say that most scientists today will tell you that time travel is impossible. Three of today's top physicists - Charles Liu, Brian Green and Michio Kaku - all hold that time travel is, if not impossible, unlikely in the extreme. However, one of the most brilliant minds of our time, physicist Stephen Hawking, disagrees - although only partially. He believes that time travel is theoretically possible, but only into the future. .... But What Do Real People Experience? The opinion of science, however, has never stopped thousands of people around the world from reporting what they firmly believe are

What others say about this ebook:

**Review 1:**

I enjoyed this book very much. I did not realize there were so many "time travel/slip" stories. Enjoy. It's a fascinating read.

**Review 2:**

Save your money and just look for the same stories on the Internet. Each story is just the bare bones information with no real research, in depth hypotheses, nor any background information. Presented as short vignettes in the Ripley's style. Short book, but don't waste the 3 bucks. The author probably spent all of a day getting these stories from web searches.

**Review 3:**

Great read! Kept me entertained and engrossed all the way through the book. I recommend this and Richard's second book in the series.

**Review 4:**

Very interesting book. Many of the stories were from real people.

**Review 5:**

Interesting stories. Worth the read.
